

Luminaire

Lina28

28-500K-20GED/830, W

The Lina28 luminaire with direct or direct-indirect light distribution is the thinnest linear luminaire in our product range. It is made of highquality aluminium profile and the luminaire also includes an electronic ballast, which does not need to be placed outside the luminaire, as is usual with such thin profiles. The luminaire features an integrated optical louver, which ensures low values of the UGR parameter, or, as an alternative option, an opal diffuser made of PMMA material which guarantees a premium UV stability. All of this makes the pendant luminaire suitable for offices, corridors, social spaces or whenever a minimalist design is required. Share
